PRODUCT INFORMATION

The VR-System PRO (VR-PRO) is the professional photography system for cubical panoramas. With this system the camera can be rotated horizontally and vertically around the nodal point. Engravings on the clamping plates make each camera-specific position reproducible. A patented (pat. pend.) adjustment permits taking photos at 8 different angles with click-stops: 36 click-stop-positions (10°), 24 click-stop-positions (15°), 18 click-stop-positions (20°), 15 click-stop-positions (24°), 12 click-stop-positions (30°), 10 click-stop-positions (36°), 8 click-stop-positions (45°) and steplessly (360°). The horizontal rotation is facilitated by a 2 x 180° engraving in opposite direction.

The VR-System PRO consists of:

- Panorama plate with click-stop and quick-release, engraving 360 degrees
- Clamping plate in L-form with scaling 185/225 mm
- Panorama plate with quick-release, engraving 2x 180 degrees
- Clamping plate with scaling 155 mm
- Spirit level for flash shoe

WITH COMPLIMENTS

TECHNICAL DATA

Order code: | VR-PRO
Weight: | 1460 g (3.20 lbs)
Tripod connection: | 1/4" | 3/8"
Camera connection: | 1/4"
